

Pliant – Infrastructure Automation

“Network Automation platforms help infrastructure and operations networking leaders move beyond siloed or tactical network automation implementations, to scale and improve the level of automation in their environments.”

Gartner - Market Guide for Network Automation Platforms

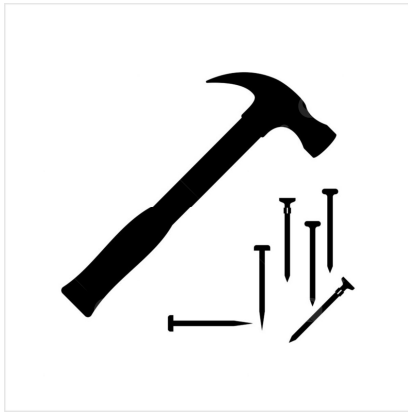

There are many ways to solve an automation problem, with a vast array of tools;
...which can lead to overload

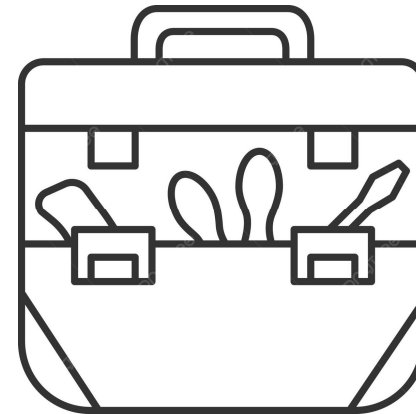

...and there is good and bad automation

“Hammer” problem

Favourite tools end up becoming hammers, where everything then looks like a nail.

“Tool-bag” approach

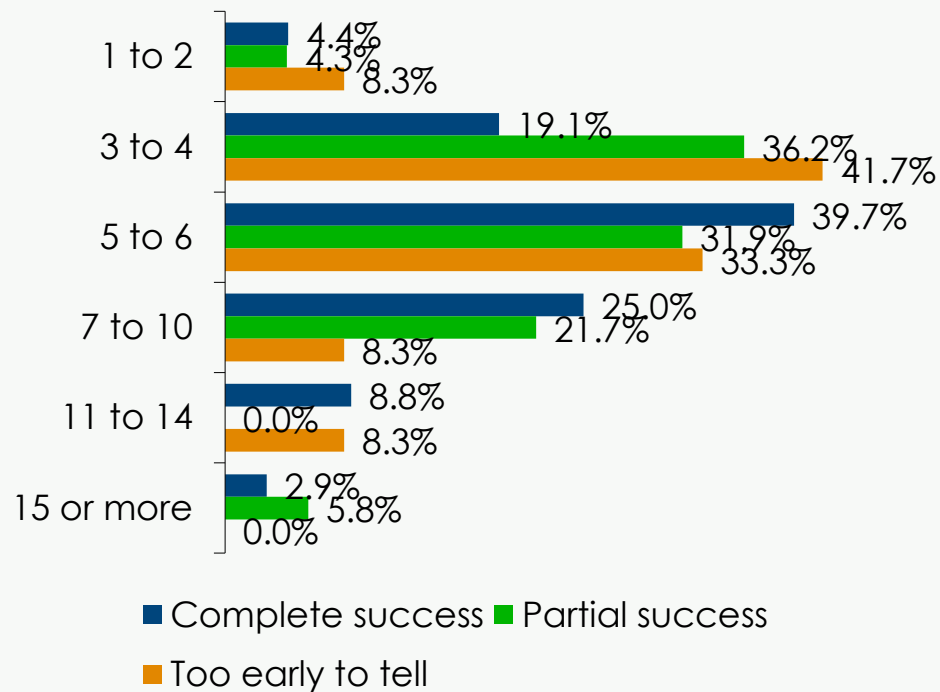

Different tools for different jobs is the way of great craftsmen.

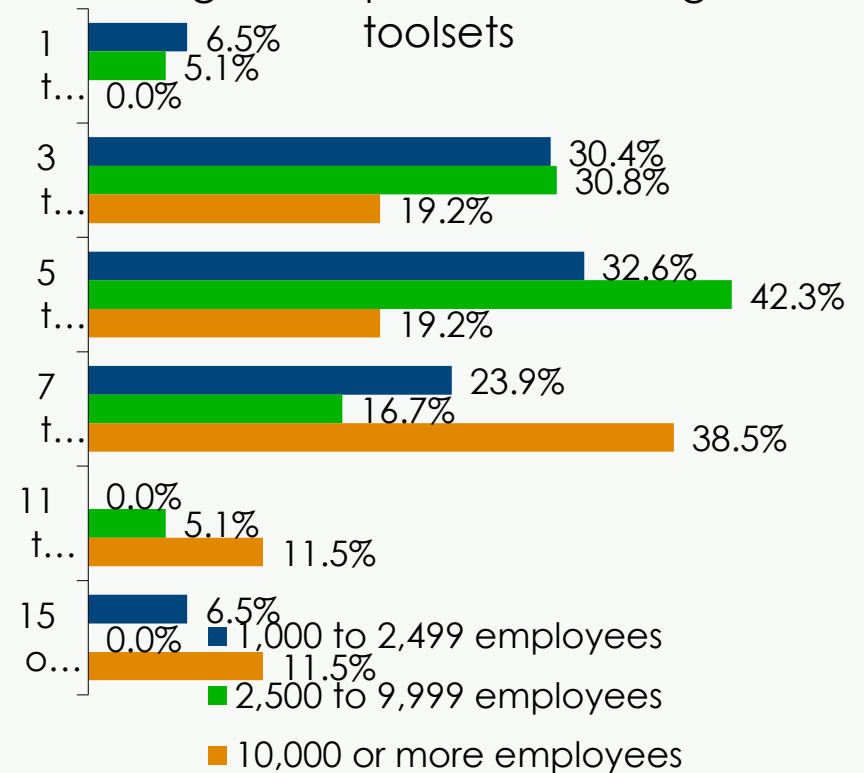

Law of ***Could*** you versus ***Should*** you

Number of tools vs. Project success

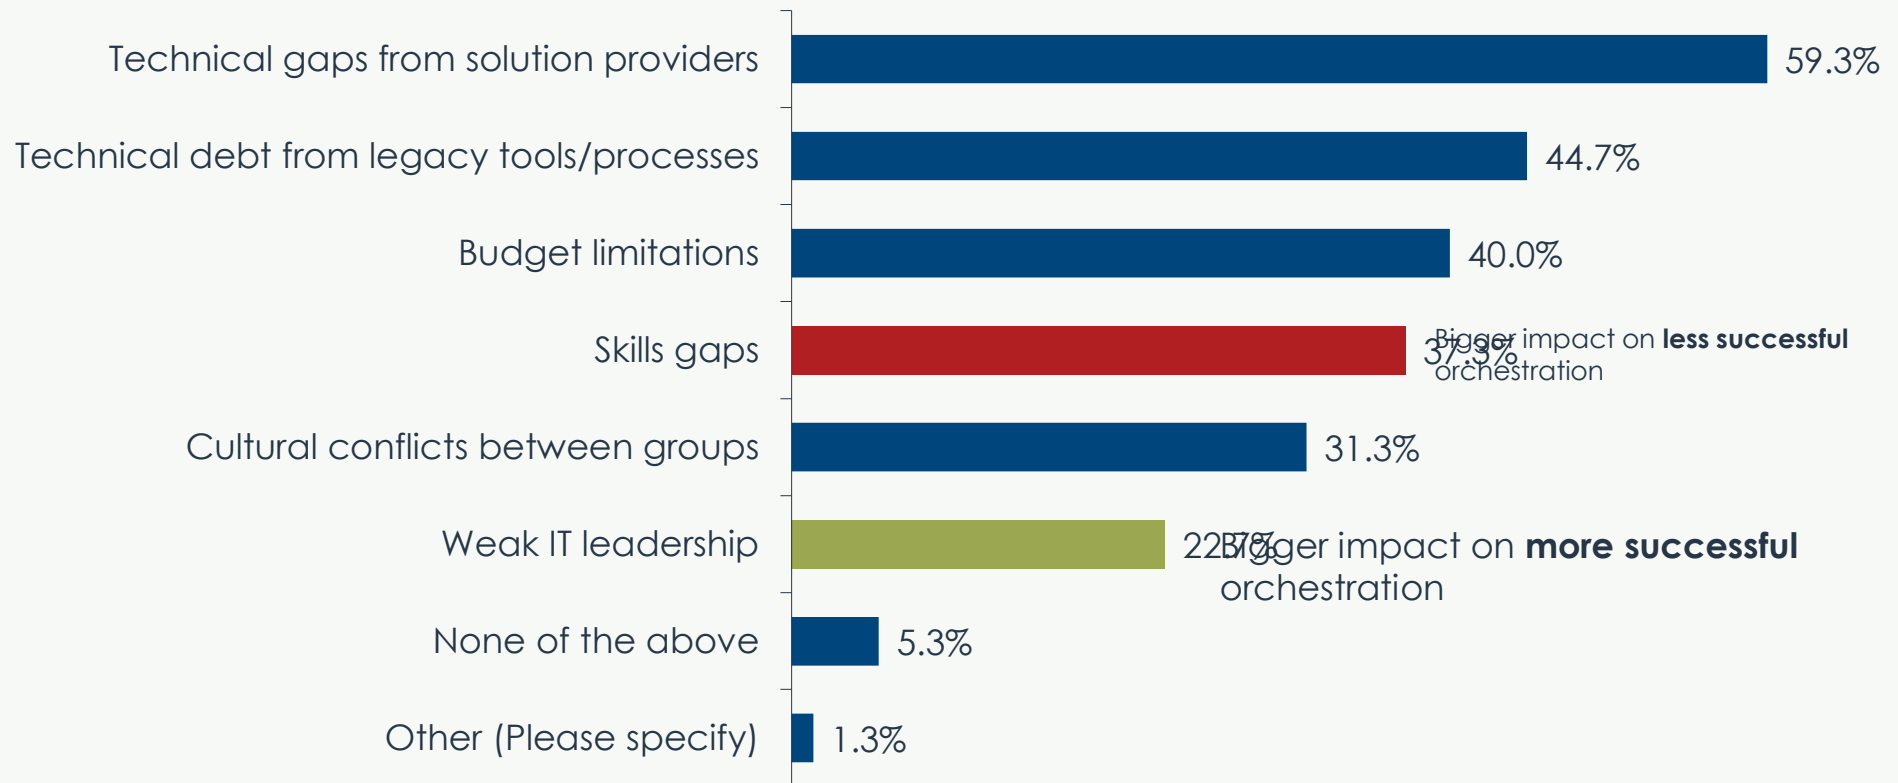

Larger toolsets = successful orchestration

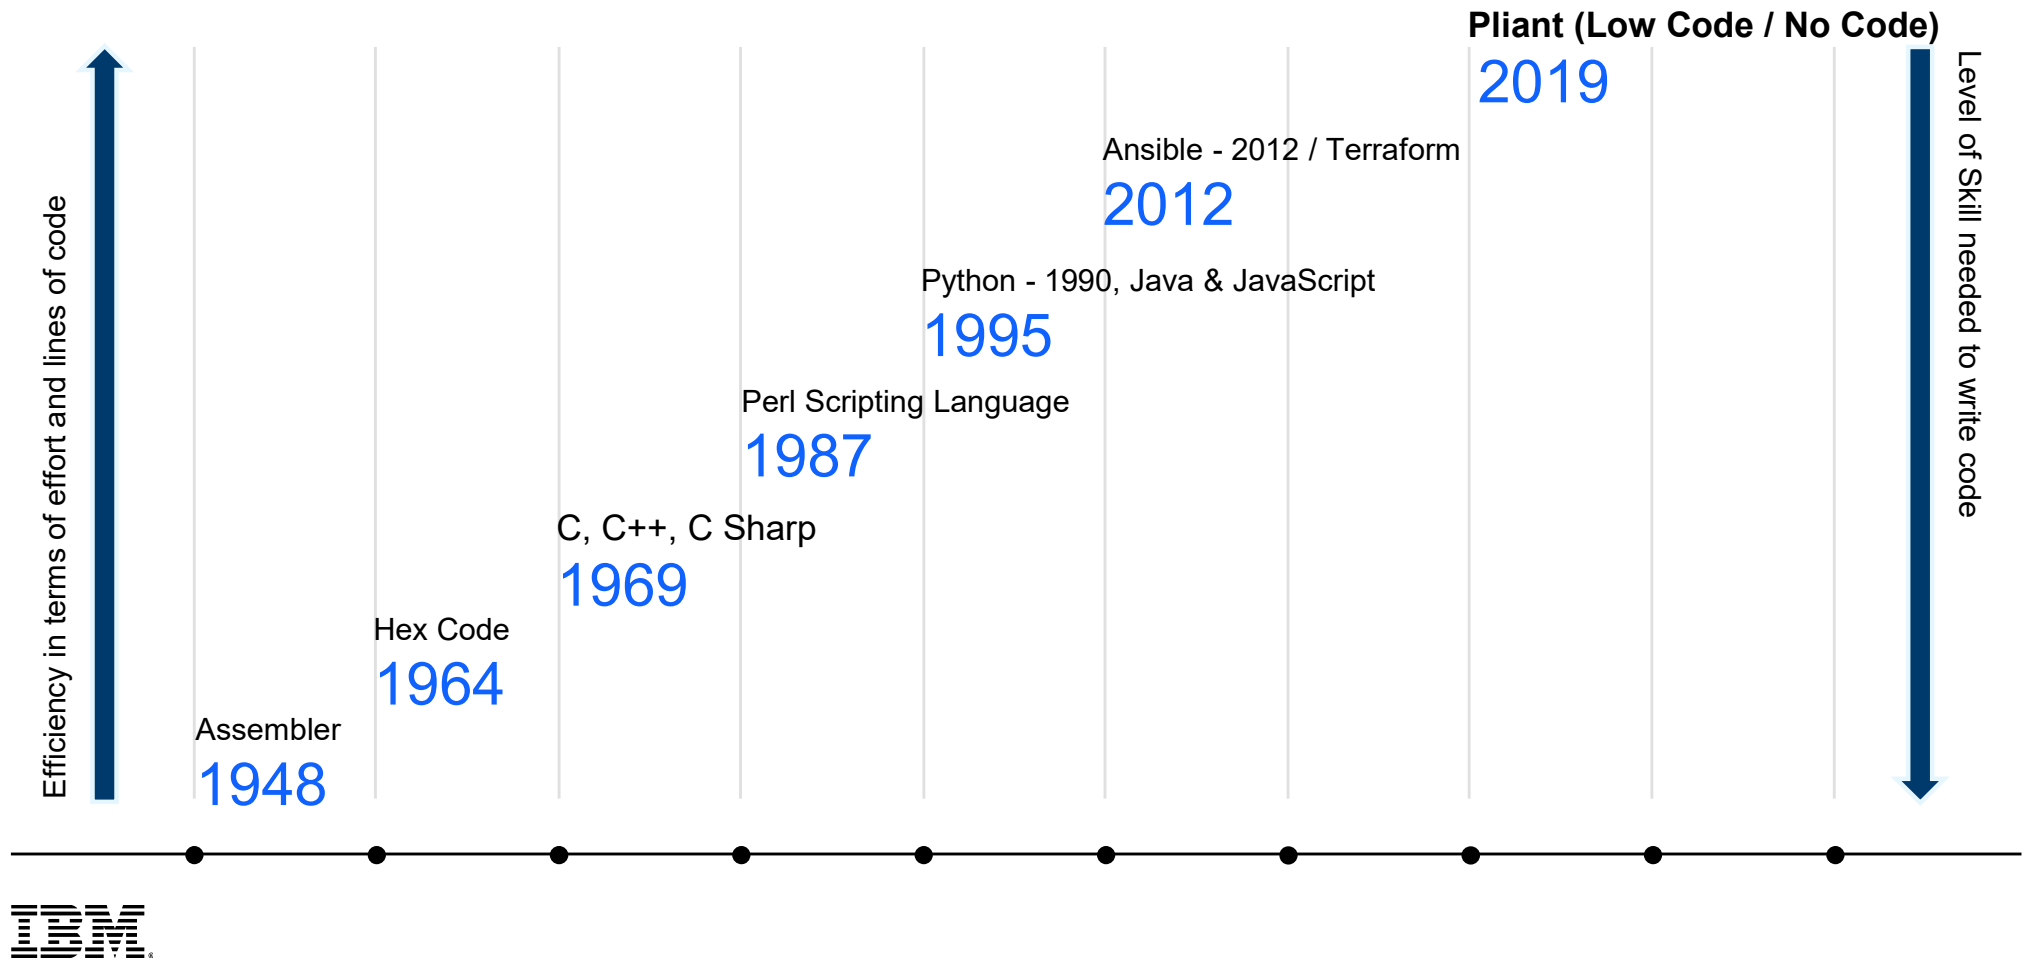

Larger companies have larger toolsets

What are your organization's biggest challenges to implementing an integrated approach to orchestration and automation across all layers of digital infrastructure?

Programming language journey

IT orchestration that goes beyond your infrastructure

Rapid infrastructure automation,

through a user-friendly, low-code interface.

Vast integration library

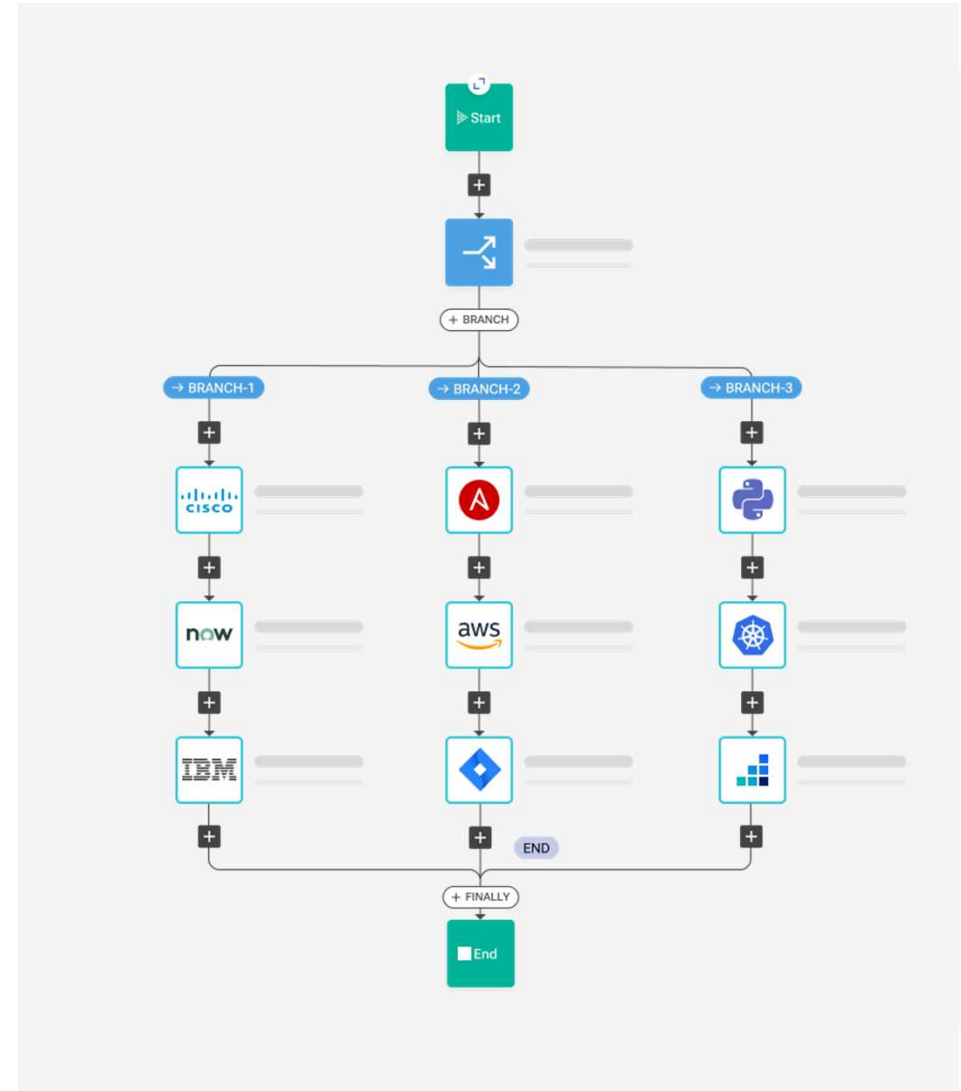

delivering 250+ updated vendor, and your proprietary, APIs as action blocks.

IT orchestration

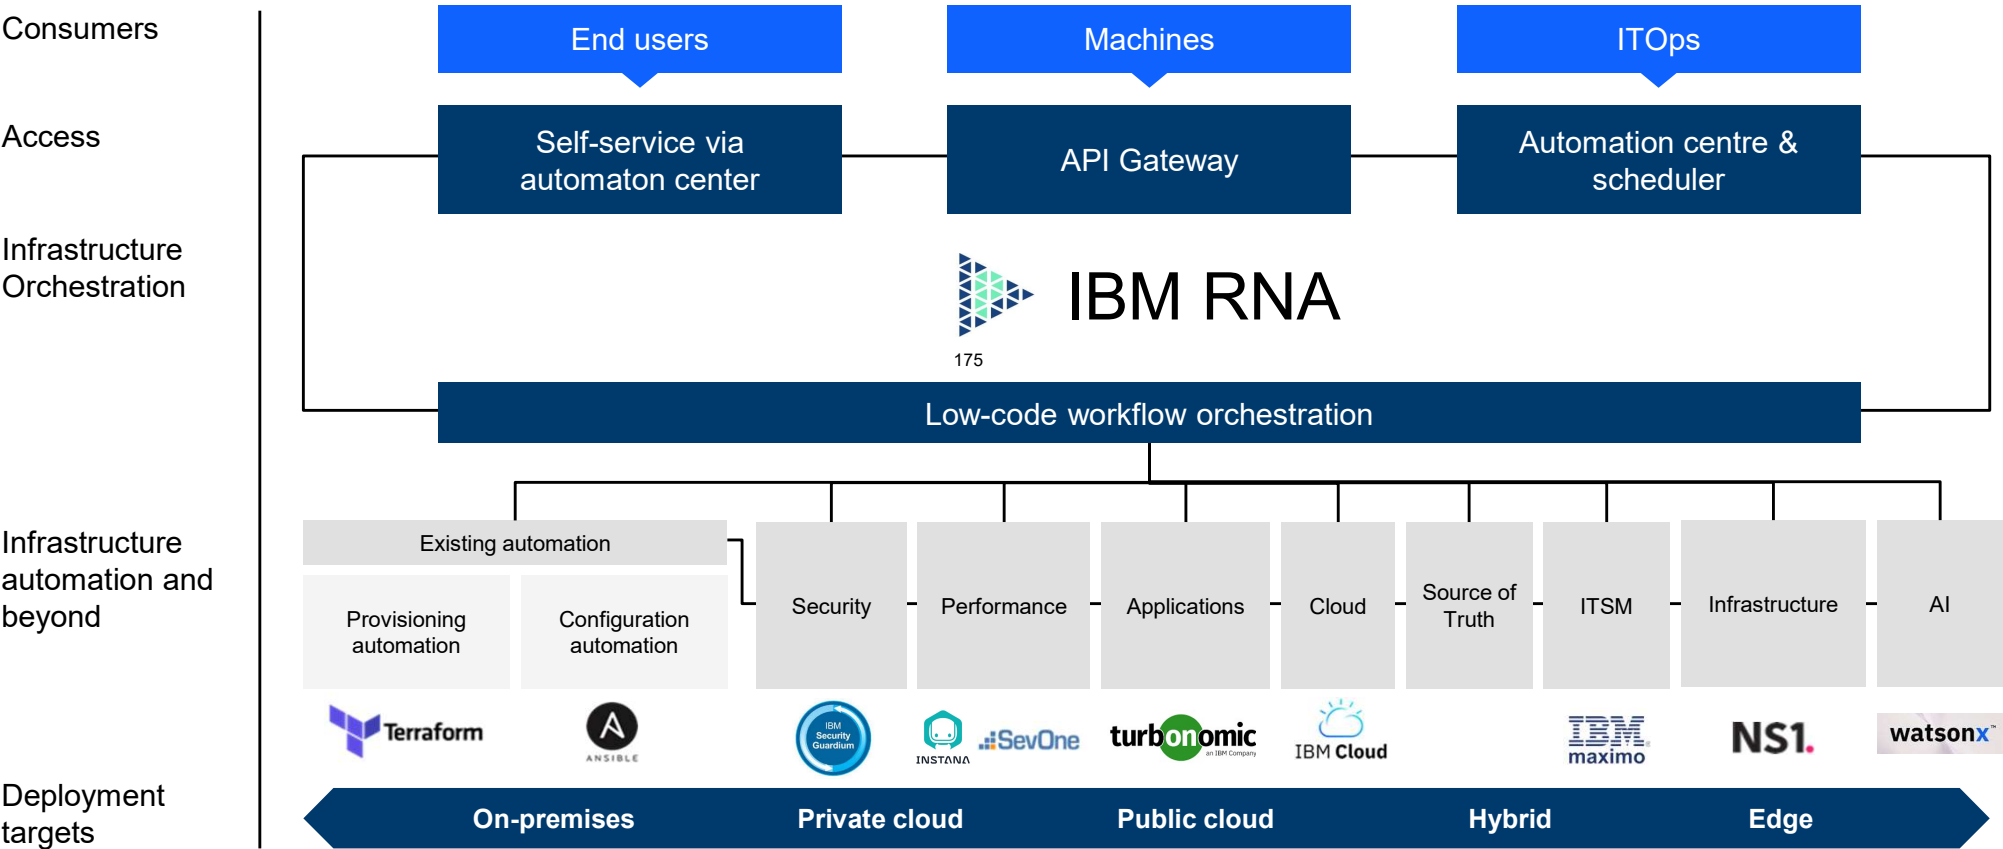

using complex logic, existing automation and other tools across your operational silos at scale.

Automation hub

that offers enterprise level automation governance through sharable and reusable workflows, API Gateway, secure execution and built-in automation dashboards.

Evolve beyond simple automation

RNA orchestration goes beyond your infrastructure

Broadest coverage in the industry: 250+ out-of-the-box abstracted vendor APIs with 1000s of actions

APIs as drag-and-drop action blocks

Vendor action blocks are constantly updated

15-DAY API INTEGRATION SLO

IBM Rapid Network Automation

- ✓ Reduce dependency on specialized automation skills
- ✓ Preserve existing automation investment
- ✓ Orchestrate across silos of technology
- ✓ Low code UI enables productivity, quick learning curve
- ✓ 50% reduction in manpower costs for large projects
